WAVELETS

Create a Wavelet

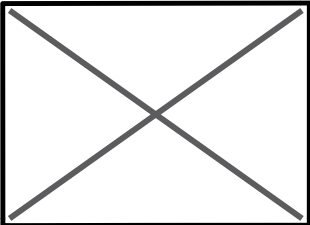

Wavelet analysis started in the mid-eighties with the study of seismic signals and expanded later to many other signal processing applications like analysis of medical signals (electrocardiograms) and signal compression (Stark 2015).

The following are some wavelet function examples in time domain:

Haar Wavelet

(Stark 2005, p26)

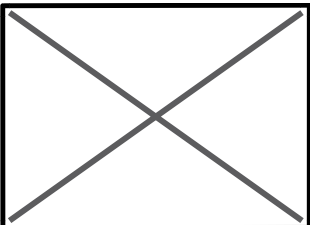

$$\Psi(t) = \begin{cases} 1 & 0 \leq t < \frac{1}{2} \\ -1 & \frac{1}{2} \leq t < 1 \\ 0 & \text{else} \end{cases}$$

Ricker Wavlet

(Wang 2015, p112)

$$\Psi(t) = \left(1 - \frac{1}{2} \omega_p^2 t^2\right) e^{\frac{1}{4} \omega_p^2 t^2}$$
